

Invasive Species as Dye Plants

Rhiana
May 2026

Thanks
for coming
to my
Presentation!

OR any
invasive
plants you
see in your
yard, give
it a try!
(and let me know
how it goes)

Other Invasives worth trying...
Paper Mulberry
Silk Tree Mimosa
Privet berries
China berry
Chinese Pistache
Chinese Tallow Tree
Taiwanese
Photinia

texasinvasives.org

Nandina Domestica (Heavenly Bamboo)

- The yellow in the roots is Berberine
- Google says it's a pigment
- I did not find the results worth the effort.

400% WOF
Dry Leaves
& stems

Alcohol
Extract

Alcohol Extract
with Iron
Modifier

Fresh Leaves
1000% WOF
(I just threw
the leaves in)

Same batch
with 15 mins
in an iron bath

Tree of Heaven

- Ailanthus altissima
- I steeped these for a long time, like 2 days (I forgot about them)
 - Very pleased with the result, will try again with lower WOF.
